

DAVIS®

Side by Side

Designed by Dick Spierenburg & Karel Boonzaaijer

Characterized by the smooth curvature of the seat design coupled with the crisp, straight edges of the exterior, Side by Side brings a new world of possibilities to every facet of the modern office. Dress it up for a formal setting—the impossibly thin metal legs compliment the clean silhouette of the minimalist design—or play it up with a bold color in one of a multitude of configurations.

The foundation of Side by Side is held in the building blocks of left-facing, right-facing, and straight pieces. When brought together, the design combinations are countless. Create stand-alone chairs, a small tête-à-tête, private booth work spaces, winding modular configurations, or seating to fill an entire room.

Side by Side High Back is perfect for creating a room within a room; a space within a space. Utilize the privacy of the high-backs to create a small, private working booth with multiple freestanding table options to complete the unit.
