Ginkgo Wire Barstool

Designed by Jehs+Laub

Ginkgo Wire is a uniquely flexible collection constructed of solid steel rods. The Ginkgo line is trademarked by the complex and sculptural curvature of the shell – folded in ever so slightly like leaves of a tree. The Ginkgo Wire collection features precise radial curves that mimic the unique shape of the Ginkgo shell from an entirely new perspective.

Ginkgo Wire barstools can be used for both indoor and outdoor applications, with a full collection of complementary pieces to complete the space.
